

A Brief History of Pickens County

Pickens County, named for Revolutionary War hero Andrew Pickens, was Indian Territory until after the American Revolution. The first European settlers to the region were Indian traders. The present day counties of Pickens, Greenville, Anderson and Oconee were originally part of the Washington District created by the state legislature in 1791. Seven years later, the Washington District was divided into the Greenville and Pendleton Districts. In 1826, in response to the increasing population and poor transportation facilities, the legislature divided the Pendleton District into Anderson and Pickens Districts. After the Civil War, the South Carolina Constitutional Convention changed the term District to County and split the Pickens District in 1868. The western portion of the District became Oconee County.

The first Pickens District Courthouse was built on the Keowee River in what is now Oconee County. When the County was divided, a second Courthouse was built about 14 miles east of Keowee on forty acres of land donated by Elihu Griffin which became the town of Pickens, the County Seat. In 1892 a third courthouse was built and with several renovations and additions, is still in use today.

During the 1870s, the County voted to issue bonds to construct 27 miles of the Atlanta and Charlotte Air Line Railroad (later called the Southern Railway) through the southern portion of the County. The towns of Easley, Liberty and Central grew up around the railroad and this southern portion is still the most densely populated part of the County. The nine miles of track from Pickens to Easley was completed in 1898.

In 1895, the County's first modern cotton mill was established in Catechee. By 1900, Pickens County had two railroads, three cotton mills, four brickyards, two banks and thirty-seven sawmills. Until 1940, Pickens County remained primarily an agricultural and rural county, with most citizens involved in the growing of cotton or the making of cloth. By the end of World War II, manufacturing had replaced agriculture as the leading source of employment. By 1972, there were 99 manufacturing plants and the number of persons employed in manufacturing continued to increase throughout the 1970s. Although textiles continue to account for a large part of manufacturing employment, Pickens County has attracted other types of industry in an attempt to diversify the local economy. Since 1994, capital investments of over \$313 million have created over 3,400 new jobs in Pickens County. The County has recently purchased capacity in a wastewater treatment plant in order to provide for additional economic growth. The Commerce Park completed in 2003 has attracted four new businesses to the County.

In addition to manufacturing, education and tourism have contributed to the economic growth of Pickens County. Clemson University, founded in 1889 by a bequest of Thomas Green Clemson as an agricultural college, has an enrollment of over 17,000 students and employs over 4,400 staff and faculty. Lakes Jocassee, Keowee and Hartwell, as well as the mountains in the northern section of the County, provide numerous opportunities for recreation and attract a growing number of tourists. Several upscale communities have been developed around the lakes. For those interested in outdoor activities, Pickens County offers golfing, hunting, fishing, boating, horseback riding, camping and hiking. Due to the variations in climate and terrain, the County hosts an incredible variety of plants and animals. The Department of Natural Resources lists over 140 rare, threatened or endangered species within Pickens County.

Pickens County remains committed to balancing economic growth with environmental responsibility to ensure the County remains a great place to work, live and visit.

Economic Characteristics

Manufacturing is the County's primary source of economic growth. There are approximately 150 facilities in the Easley, Liberty, and Pickens areas. There are an estimated 12,000 people employed in manufacturing. More than half are employed in the metalworking and industrial equipment industries. The County is in transition to become heavily focused on research and development. Clemson University, a top 100 research university, has concentrated on advanced materials, biopharma, motorsports, and fibers. In addition, the University plays a major role in the local economy by employing over 4,600 faculty and staff.
